Early Human Development, 29 (1992) 407–412
Elsevier Scientific Publishers Ireland Ltd.

Subject index

acceleration, preterm fetus well-being, low amplitude of LTV, 251
albumin injection, non-immunologic hydrops fetalis, digitalization, 241
amino acid transport, fetal amino acids, fetal metabolism, placental amino acids, placental metabolism, 99
amino acids, intrauterine growth retardation, percutaneous umbilical blood sampling (PUBS), 183
amniotomy, prolonged labour, caesarean section, 309
anemia, fetus, Rh-incompatibility, transfusion, 237
antenatal diagnosis, fetal abnormality, fetal surgery, ultrasonic examination, 357
antenatal diagnosis, ovarian cyst, 363
appropriate technology, perinatal mortality, regionalized perinatal care, 203
ascending infections, prevention of prematurity, prevention of late abortion, 15
atrial natriuretic factor (ANF), urine volume, cyclic-GMP, endothelin, 161
autoimmune thrombocytopenic purpura, feto-natal thrombocytopenia at birth, previous maternal splenectomy, platelet count, 143

betamimetic drugs, fetal distress, reanimation, 27
blood pressure, patent ductus arteriosus, chronic lung disease, premature infant, overview, 287
brainstem, sudden infant death syndrome, dendrites, development, respiration, 171
breast milk, thyroid hormone, epidermal growth factor, 329
broncho-pulmonary dysplasia, high frequency ventilation, conventional mechanical ventilation, preterm infants, intraventricular hemorrhage, pulmonary air leaks, 293
bronchopulmonary dysplasia, respiratory distress syndrome, surfactant prophylaxis, 275

caesarean section, prolonged labour, amniotomy, 309
cerebral oxygenation, near infra-red spectroscopy, neonatal monitoring, fetal monitoring, 269
chorioamnionitis, complement, cytokine, surfactant, Wilson-Mikity syndrome, 125
chronic lung disease, patent ductus arteriosus, premature infant, blood pressure, overview, 287
clinical management, HIV, pregnancy, 231
clinical trial, multicentre perinatal trial, clinical trial network, perinatal interventions, 313
clinical trial network, multicentre perinatal trial, clinical trial, perinatal interventions, 313
collaborative research studies, randomized clinical trials, health research needs, research methodology, Latin America, 323
collaborative study, Japan, neonatal intensive care, 317
complement, chorioamnionitis, cytokine, surfactant, Wilson-Mikity syndrome, 125
computer, ultrasound, imaging, perinatology, 199
condoms, heterosexual promiscuity, HIV, infected blood transfusion, mother-to-infant transmission, training of health personnel, 225
congenital diaphragmatic hernia, lung hypoplasia, fetus, ultrasound, extracorporeal membrane oxygenation, 375
conventional mechanical ventilation, high frequency ventilation, preterm infants, bronchopulmonary dysplasia, intraventricular hemorrhage, pulmonary air leaks, 293
cordocentesis, fetal biochemistry, growth retardation, 91
cordocentesis, fetal blood sampling, fetal assessment, 155
cordocentesis, surfactants, erythropoietin, hypoxia, free radicals, non-surgical sterilization, developing countries, 21
corticosteroids, respiratory distress syndrome (RDS), fetal lung, surfactant, lung permeability, 283
corticosteroids, respiratory distress syndrome, lung maturation, pulmonary edema, 57
cyclic-GMP, atrial natriuretic factor (ANF), urine volume, endothelin, 161
cytokine, chorioamnionitis, complement, surfactant, Wilson-Mikity syndrome, 125

decision making, medical ethics, neonatal intensive care units, neonates with poor prognosis, 403

dendrites, sudden infant death syndrome, development, respiration, brainstem, 171
developing countries, surfactants, erythropoietin, cordocentesis, hypoxia, free radicals, non-surgical sterilization, 21
developing countries, training program, Japan, 207
development, sudden infant death syndrome, dendrites, respiration, brainstem, 171
digestible protein, premature breast milk, protein composition, non-protein nitrogen, true protein, 351
digitalization, non-immunologic hydrops fetalis, albumin injection, 241
DNA analysis, Duchenne muscular dystrophy (DMD), heomphilia A, prenatal diagnosis, 149
Doppler, fetal hypoxia, umbilical artery, placental blood flow, 259
Duchenne muscular dystrophy (DMD), heomphilia A, prenatal diagnosis, DNA analysis, 149
ductus arteriosus, foramen ovale, perinatal circulation, 167
ductus arteriosus, placenta, PGE_2, parturition, fetal breathing, fetal adrenal thermogenesis, 63

early care, prenatal; perinatal, prevention, prematurity, 107
early pregnancy, transvaginal color Doppler, uteroplacental circulation, intrauterine fibroids, 385
eclampsia, randomized controlled trials, perinatal, technology assessment, immaturity, pre-eclampsia, 305
education, ultrasonography, obstetrics and gynaecology, 117
embryology, transvaginal ultrasound, first trimester of pregnancy, 381
endothelin, atrial natriuretic factor (ANF), urine volume, cyclic-GMP, 161
epidermal growth factor, breast milk, thyroid hormone, 329
erythropoietin, surfactants, cordocentesis, hypoxia, free radicals, non-surgical sterilization, developing countries, 21
esophageal atresia, T-E fistula, neonatal surgical mortality, neonatal surgical emergencies, 369
extracorporeal membrane oxygenation (ECMO), ventilation, high-frequency ventilation, respiratory failure, 299
extracorporeal membrane oxygenation, congenital diaphragmatic hernia, lung hypoplasia, fetus, ultrasound, 375

fetal abnormality, antenatal diagnosis, fetal surgery, ultrasonic examination, 357
fetal adrenal thermogenesis, placenta, PGE_2, parturition, fetal breathing, ductus arteriosus, 63
fetal amino acids, fetal metabolism, placental amino acids, amino acid transport, placental metabolism, 99
fetal assessment, fetal blood sampling, cordocentesis, 155
fetal biochemistry, cordocentesis, growth retardation, 91
fetal blood sampling, cordocentesis, fetal assessment, 155
fetal breathing, placenta, PGE_2, parturition, fetal adrenal thermogenesis, ductus arteriosus, 63
fetal distress, reanimation, betamimetic drugs, 27
fetal growth, IGF-I, IGF-binding proteins, placenta, fetus, 187
fetal growth, insulin, insulin deficiency, metabolism, 177
fetal hypoxia, Doppler, umbilical artery, placental blood flow, 259
fetal lung, respiratory distress syndrome (RDS), surfactant, corticosteroids, lung permeability, 283
fetal metabolism, fetal amino acids, placental amino acids, amino acid transport, placental metabolism, 99
fetal monitoring, near infra-red spectroscopy, cerebral oxygenation, neonatal monitoring, 269
fetal surgery, antenatal diagnosis, fetal abnormality, ultrasonic examination, 357
feto-natal thrombocytopenia at birth, autoimmune thrombocytopenic purpura, previous maternal splenectomy, platelet count, 143
fetus, anemia, Rh-incompatibility, transfusion, 237
fetus, congenital diaphragmatic hernia, lung hypoplasia, ultrasound, extracorporeal membrane oxygenation, 375
fetus, fetal growth, IGF-I, IGF-binding proteins, placenta, 187
fetus, sleep-wakefulness cycle, rapid eye movements 391
first trimester of pregnancy, transvaginal ultrasound, embryology, 381
foramen ovale, ductus arteriosus, perinatal circulation, 167
formula feeding, very low birth weight infant, nutrient requirements, human milk, 345
free radicals, surfactants, erythropoietin, cordocentesis, hypoxia, non-surgical sterilization, developing countries, 21

glycine cleavage enzyme, non-ketotic hyperglycinemia, prenatal diagnosis, 75
growth retardation, cordocentesis, fetal biochemistry, 91

health, reproduction, world, 35
health research needs, randomized clinical trials, collaborative research studies, research methodology, Latin America, 323
heomphilia A, Duchenne muscular dystrophy (DMD), prenatal diagnosis, DNA analysis, 149
heterosexual promiscuity, HIV, infected blood transfusion, mother-to-infant transmission, training of health personnel, condoms, 225
high frequency ventilation, conventional mechanical ventilation, preterm infants, broncho-pulmonary dysplasia, intraventricular hemorrhage, pulmonary air leaks, 293
high-frequency ventilation, ventilation, respiratory failure, extracorporeal membrane oxygenation (ECMO), 299
history of neonatology, infant mortality, neonatal intensive care, 43
HIV, heterosexual promiscuity, infected blood transfusion, mother-to-infant transmission, training of health personnel, condoms, 225
HIV, pregnancy, clinical management, 231
HIV/AIDS, symptomatic seropositive babies, seropositive mothers, Zambia, 221
human milk, very low birth weight infant, nutrient requirements, formula feeding, 345
human milk fortifier, very low birth weight infants, metabolic bone disease of prematurity, 339
human T-lymphotropic virus type-I, rubella, perinatal infection, virus, TORCH agents, 131
hydrops fetalis, α-thalassemia, prenatal diagnosis, 233
hypoxia, surfactants, erythropoietin, cordocentesis, free radicals, non-surgical sterilization, developing countries, 21

IGF-1, intrauterine growth retardation, placenta fetal nutrition, 193
IGF-binding proteins, fetal growth, IGF-I, placenta, fetus, 187
IGF-I, fetal growth, IGF-binding proteins, placenta, fetus, 187
imaging, computer, ultrasound, perinatology, 199
immaturity, randomized controlled trials, perinatal, technology assessment, pre-eclampsia, eclampsia, 305
infant mortality, neonatal intensive care, history of neonatology, 43
infected blood transfusion, heterosexual promiscuity, HIV, mother-to-infant transmission, training of health personnel, condoms, 225
insulin, insulin deficiency, fetal growth, metabolism, 177
insulin deficiency, insulin, fetal growth, metabolism, 177
intrauterine fibroids, transvaginal color Doppler, uteroplacental circulation, early pregnancy, 385
intrauterine growth retardation, amino acids, percutaneous umbilical blood sampling (PUBS), 183
intrauterine growth retardation, placenta fetal nutrition, IGF-1, 193
intravenous immunoglobulin (IVIG), perinatal viral infections, perinatal bacterial infection, 137
intraventricular hemorrhage, high frequency ventilation, conventional mechanical ventilation, preterm infants, broncho-pulmonary dysplasia, pulmonary air leaks, 293

Japan, neonatal intensive care, collaborative study, 317
Japan, training program, developing countries, 207

lactation, women, pregnancy, 217
Latin America, randomized clinical trials, collaborative research studies, health research needs, research methodology, 323
learning, memory and neuro-chemical sequeale, perinatal hypoxia, postnatal consequences, ornithine decarboxylase activity, polyamine concentrations, 83
low amplitude of LTV, preterm fetus well-being, acceleration, 251
lung hypoplasia, congenital diaphragmatic hernia, fetus, ultrasound, extracorporeal membrane oxygenation, 375
lung maturation, respiratory distress syndrome, corticosteroids, pulmonary edema, 57
lung permeability, respiratory distress syndrome (RDS), fetal lung, surfactant, corticosteroids, 283

management of patients in labour, training in perinatal care, senior residency programme, 111
maternal death, safe motherhood, 397
medical ethics, decision making, neonatal intensive care units, neonates with poor prognosis, 403
metabolic bone disease of prematurity, human milk fortifier, very low birth weight infants, 339
metabolism, insulin, insulin deficiency, fetal growth, 177
minerals, trace elements, rickets of prematurity, very low birth weight infant, 333
mother-to-infant transmission, heterosexual pro-

miscuity, HIV, infected blood transfusion, training of health personnel, condoms, 225
multicentre perinatal trial, clinical trial, clinical trial network, perinatal interventions, 313

near infra-red spectroscopy, cerebral oxygenation, neonatal monitoring, fetal monitoring, 269
neonatal intensive care, infant mortality, history of neonatology, 43
neonatal intensive care, Japan, collaborative study, 317
neonatal intensive care units, medical ethics, decision making, neonates with poor prognosis, 403
neonatal monitoring, near infra-red spectroscopy, cerebral oxygenation, fetal monitoring, 269
neonatal surgical emergencies, esophageal atresia, T-E fistula, neonatal surgical mortality, 369
neonatal surgical mortality, esophageal atresia, T-E fistula, neonatal surgical emergencies, 369
neonates with poor prognosis, medical ethics, decision making, neonatal intensive care units, 403
non-immunologic hydrops fetalis, albumin injection, digitalization, 241
non-ketotic hyperglycinemia, glycine cleavage enzyme, prenatal diagnosis, 75
non-protein nitrogen, premature breast milk, protein composition, true protein, digestible protein, 351
non-surgical sterilization, surfactants, erythropoietin, cordocentesis, hypoxia, free radicals, developing countries, 21
nutrient requirements, very low birth weight infant, human milk, formula feeding, 345

obstetrics and gynaecology, ultrasonography, education, 117
ornithine decarboxylase activity, perinatal hypoxia, postnatal consequences, learning, memory and neuro-chemical sequeale, polyamine concentrations, 83
ovarian cyst, antenatal diagnosis, 363
overview, patent ductus arteriosus, chronic lung disease, premature infant, blood pressure, 287

parturition, placenta, PGE_2, fetal breathing, fetal adrenal thermogenesis, ductus arteriosus, 63
patent ductus arteriosus, chronic lung disease, premature infant, blood pressure, overview, 287
percutaneous umbilical blood sampling (PUBS), intrauterine growth retardation, amino acids, 183
perinatal, prenatal; early care, prevention, prematurity, 107
perinatal, randomized controlled trials, technology assessment, immaturity, pre-eclampsia, eclampsia, 305
perinatal bacterial infection, intravenous immunoglobulin (IVIG), perinatal viral infections, 137
perinatal circulation, ductus arteriosus, foramen ovale, 167
perinatal computing, strategic planning, 51
perinatal hypoxia, postnatal consequences, learning, memory and neuro-chemical sequeale, ornithine decarboxylase activity, polyamine concentrations, 83
perinatal infection, rubella, human T-lymphotropic virus type-1, virus, TORCH agents, 131
perinatal interventions, multicentre perinatal trial, clinical trial, clinical trial network, 313
perinatal mortality, regionalized perinatal care, appropriate technology, 203
perinatal viral infections, intravenous immunoglobulin (IVIG), perinatal bacterial infection, 137
perinatology, computer, ultrasound, imaging, 199
PGE_2, placenta, parturition, fetal breathing, fetal adrenal thermogenesis, ductus arteriosus, 63
placenta, fetal growth, IGF-I, IGF-binding proteins, fetus, 187
placenta, PGE_2, parturition, fetal breathing, fetal adrenal thermogenesis, ductus arteriosus, 63
placenta fetal nutrition, intrauterine growth retardation, IGF-1, 193
placental amino acids, fetal amino acids, fetal metabolism, amino acid transport, placental metabolism, 99
placental blood flow, Doppler, fetal hypoxia, umbilical artery, 259
placental metabolism, fetal amino acids, fetal metabolism, placental amino acids, amino acid transport, 99
platelet count, autoimmune thrombocytopenic purpura, feto-natal thrombocytopenia at birth, previous maternal splenectomy, 143
polyamine concentrations, perinatal hypoxia, postnatal consequences, learning, memory and neuro-chemical sequeale, ornithine decarboxylase activity, 83
postnatal consequences, perinatal hypoxia, learning, memory and neuro-chemical sequeale, ornithine decarboxylase activity, polyamine concentrations, 83
pre-eclampsia, randomized controlled trials, perinatal, technology assessment, immaturity, eclampsia, 305
pregnancy, HIV, clinical management, 231
pregnancy, women, lactation, 217

premature breast milk, protein composition, non-protein nitrogen, true protein, digestible protein, 351
premature infant, patent ductus arteriosus, chronic lung disease, blood pressure, overview, 287
prematurity, prenatal; perinatal, early care, prevention, 107
prenatal diagnosis, Duchenne muscular dystrophy (DMD), heomphilia A, DNA analysis, 149
prenatal diagnosis, non-ketotic hyperglycinemia, glycine cleavage enzyme, 75
prenatal diagnosis, α-thalassemia, hydrops fetalis, 233
prenatal; perinatal, early care, prevention, prematurity, 107
preterm fetus well-being, low amplitude of LTV, acceleration, 251
preterm infants, high frequency ventilation, conventional mechanical ventilation, bronchopulmonary dysplasia, intraventricular hemorrhage, pulmonary air leaks, 293
prevention, prenatal; perinatal, early care, prematurity, 107
prevention of late abortion, prevention of prematurity, ascending infections, 15
prevention of prematurity, prevention of late abortion, ascending infections, 15
previous maternal splenectomy, autoimmune thrombocytopenic purpura, feto-natal thrombocytopenia at birth, platelet count, 143
primary perinatal care, reasons for inadequacy and methodology of provision, 211
prolonged labour, caesarean section, amniotomy, 309
protein composition, premature breast milk, non-protein nitrogen, true protein, digestible protein, 351
pulmonary air leaks, high frequency ventilation, conventional mechanical ventilation, preterm infants, broncho-pulmonary dysplasia, intraventricular hemorrhage, 293
pulmonary edema, respiratory distress syndrome, lung maturation, corticosteroids, 57

randomized clinical trials, collaborative research studies, health research needs, research methodology, Latin America, 323
randomized controlled trials, perinatal, technology assessment, immaturity, pre-eclampsia, eclampsia, 305
rapid eye movements fetus, sleep-wakefulness cycle, 391
reanimation, fetal distress, betamimetic drugs, 27
reasons for inadequacy and methodology of provision, primary perinatal care, 211
regionalized perinatal care, perinatal mortality, appropriate technology, 203
reproduction, health, world, 35
research methodology, randomized clinical trials, collaborative research studies, health research needs, Latin America, 323
respiration, sudden infant death syndrome, dendrites, development, brainstem, 171
respiratory distress syndrome (RDS), fetal lung, surfactant, corticosteroids, lung permeability, 283
respiratory distress syndrome, lung maturation, corticosteroids, pulmonary edema, 57
respiratory distress syndrome, surfactant prophylaxis, bronchopulmonary dysplasia, 275
respiratory failure, ventilation, high-frequency ventilation, extracorporeal membrane oxygenation (ECMO), 299
Rh-incompatibility, anemia, fetus, transfusion, 237
rickets of prematurity, trace elements, minerals, very low birth weight infant, 333
rubella, human T-lymphotropic virus type-1, perinatal infection, virus, TORCH agents, 131

safe motherhood, maternal death, 397
senior residency programme, training in perinatal care, management of patients in labour, 111
seropositive mothers, symptomatic seropositive babies, HIV/AIDS, Zambia, 221
sleep-wakefulness cycle, fetus, rapid eye movements 391
strategic planning, perinatal computing, 51
sudden infant death syndrome, dendrites, development, respiration, brainstem, 171
surfactant, chorioamnionitis, complement, cytokine, Wilson-Mikity syndrome, 125
surfactant, respiratory distress syndrome (RDS), fetal lung, corticosteroids, lung permeability, 283
surfactant prophylaxis, respiratory distress syndrome, bronchopulmonary dysplasia, 275
surfactants, erythropoietin, cordocentesis, hypoxia, free radicals, non-surgical sterilization, developing countries, 21
symptomatic seropositive babies, seropositive mothers, HIV/AIDS, Zambia, 221

T-E fistula, esophageal atresia, neonatal surgical mortality, neonatal surgical emergencies, 369
technology assessment, randomized controlled

trials, perinatal, immaturity, pre-eclampsia, eclampsia, 305
α-thalassemia, hydrops fetalis, prenatal diagnosis, 233
thyroid hormone, breast milk, epidermal growth factor, 329
TORCH agents, rubella, human T-lymphotropic virus type-1, perinatal infection, virus, 131
trace elements, minerals, rickets of prematurity, very low birth weight infant, 333
training in perinatal care, management of patients in labour, senior residency programme, 111
training of health personnel, heterosexual promiscuity, HIV, infected blood transfusion, mother-to-infant transmission, condoms, 225
training program, Japan, developing countries, 207
transfusion, anemia, fetus, Rh-incompatibility, 237
transvaginal color Doppler, uteroplacental circulation, early pregnancy, intrauterine fibroids, 385
transvaginal ultrasound, embryology, first trimester of pregnancy, 381
true protein, premature breast milk, protein composition, non-protein nitrogen, digestible protein, 351

ultrasonic examination, antenatal diagnosis, fetal abnormality, fetal surgery, 357
ultrasonography, education, obstetrics and gynaecology, 117
ultrasound, computer, imaging, perinatology, 199
ultrasound, congenital diaphragmatic hernia, lung hypoplasia, fetus, extracorporeal membrane oxygenation, 375
umbilical artery, Doppler, fetal hypoxia, placental blood flow, 259
urine volume, atrial natriuretic factor (ANF), cyclic-GMP, endothelin, 161
uteroplacental circulation, transvaginal color Doppler, early pregnancy, intrauterine fibroids, 385

ventilation, high-frequency ventilation, respiratory failure, extracorporeal membrane oxygenation (ECMO), 299
very low birth weight infant, nutrient requirements, human milk, formula feeding, 345
very low birth weight infant, trace elements, minerals, rickets of prematurity, 333
very low birth weight infants, human milk fortifier, metabolic bone disease of prematurity, 339
virus, rubella, human T-lymphotropic virus type-1, perinatal infection, TORCH agents, 131

Wilson-Mikity syndrome, chorioamnionitis, complement, cytokine, surfactant, 125
women, pregnancy, lactation, 217
world, reproduction, health, 35

Zambia, symptomatic seropositive babies, seropositive mothers, HIV/AIDS, 221
